Meet the Real Me!!!

Create a new folder in your HTML folder called **the_real_me,** then create a subfolder called **pics.** In the **the_real_me** folder, create a new page called **index.html.** In the **pics** subfolder, insert each of the images used in the assignment. Using HTML, you are to create a page that uses pictures to describe you. Find an image in each of the following categories below and insert them into a web page using tables.

Find an image in each of the following categories that describes you and save it in the above folder. (Don't choose an image that you like, but one that reflects your personality in some way.)

1. Movie
2. Musician or band
3. Movie or cartoon character
4. Car
5. Animal
6. Occupation
7. Image of your choice

Once you have found and saved your images, create a page using the following guidelines:

1. Your page should use a table like the one below.
2. The top row of your table should contain a heading using Flamingtext or Fireworks.
3. Each image should contain a short explanation of WHY it describes your personality. (A sentence or two is enough for each.)
4. Each image should be 250 pixels wide.
5. Customize your table using a color scheme.

Sample Table

Heading Image	
Pic 1	Explanation
Pic 2	Explanation
"	"
"	"
"	"
"	"
